Priya Raghunathan

Senior Data Engineer

PROFILE

Data engineer with eight years building batch and streaming pipelines in regulated environments. Led the migration of a 40TB on-premise warehouse to Redshift with no reported data loss.

EXPERIENCE

Nationwide Building Society

Senior Data Engineer
March 2022 - Present

- Rebuilt the nightly regulatory reporting pipeline, cutting runtime from 6 hours to 40 minutes and removing a recurring SLA breach that had been flagged twice by internal audit.
- Mentored three junior engineers; two promoted within eighteen months.

Auto Trader UK

Data Engineer
07/2019 - 02/2022

- Owned the event ingestion layer handling ~120M events daily.
- Introduced dbt, reducing model duplication across four analytics teams.

Kantar

Analyst (Data)
Sep 2017 to Jun 2019

- Built automated survey weighting in Python, replacing a manual Excel process.

EDUCATION

BSc Mathematics, University of Warwick
2014 - 2017, First Class Honours
