

Devansh Kulkarni

Senior Backend Engineer

PROFILE

Backend engineer with nine years on high-throughput transactional systems, most recently owning the ledger and settlement services behind a card acquiring platform processing around 4.2 million authorisations a month. Comfortable being the person on call for the thing that must not lose money.

EXPERIENCE

Halloway Digital Ltd

Senior Backend Engineer

January 2023 - Present

- Own the double-entry ledger service in Go: 4.2M authorisations/month, p99 write latency held under 45ms through two Black Fridays.
- Led the move from a shared Postgres instance to per-service databases with change-data-capture into Kafka, retiring 31 cross-schema joins.
- Introduced contract testing between eleven services, which cut integration-environment breakages from roughly weekly to two in a year.

Brightmoor Payments Ltd

Backend Engineer, Payments Core

08/2020 - 12/2022

- Built the idempotency and retry layer for a scheme-facing API; eliminated a duplicate-capture defect that had cost the business around 60k in refunds over the prior year.
- On-call rota lead. Rewrote the runbooks nobody had read.

Cindermill Labs

Software Engineer

Mar 2017 to Jul 2020

- Python and Django on a logistics tracking product; scaled the webhook fan-out from 200k to 9M deliveries a day.
- First engineer on the team to ship anything into Kubernetes.

Vexley Retail Group

Graduate Software Developer

2015 - 2017

- Maintained a legacy stock-allocation batch job written in Perl.

EDUCATION

BSc (Hons) Computer Science, Kesterwick University

2012 - 2015, 2:1
